Request for Themed Issue Submissions On:

Medical Education:

ANESTHESIOLOGY is calling for submission of manuscripts on Anesthesiology Education. Manuscripts focused on simulation and the Accreditation Council for Graduate Medical Education six-core competencies are desired. Authors may craft manuscripts presenting original research, reviews and methodologies and strategies related to education of medical students (undergraduate medical education), residents and fellows (graduate medical education) and practitioners (continuing medical education). Manuscripts related to education that conform to other types of papers (Clinical Concepts and Commentary (CCC) Articles, Case Reports, Mind to Mind, Images in Anesthesiology) described in ANESTHESIOLOGY’S Instructions for Authors will also be welcome. All submissions will undergo peer review by Editors and Reviewers with expertise in the topic. Deadline for submission is May 1, 2013, with electronic publication shortly after acceptance and print publication in January 2014. The Medical Education Theme Issue will be accompanied by editorials and press releases highlighting these articles.

Cardiac Arrest and Resuscitation:

ANESTHESIOLOGY is calling for submission of manuscripts on cardiac arrest and resuscitation. Submissions that address prevention, prediction, recognition, treatment, and prognosis after cardiac arrest are encouraged, including original research, systematic reviews and meta-analyses. Manuscripts related to Cardiac Arrest and Resuscitation that conform to other types of papers (Clinical Concepts and Commentary (CCC) Articles, Case Reports, Mind to Mind, Images in Anesthesiology) described in ANESTHESIOLOGY Instructions for Authors will also be welcome. All submissions will undergo peer review headed by a panel of Editors with expertise in the topic. Deadline for submission is August 1, 2013, with electronic publication shortly after author acceptance and print publication in April, 2014. As is the usual practice at ANESTHESIOLOGY, this themed issue will be accompanied by editorials and press releases highlighting these articles.

For both of the above Special Issues, please review the Anesthesiology Instructions for Authors online at:
